

PRODUCT DECLARATION

For products made from recycled raw material

Due to the inhomogeneity of recycled polyethylene raw materials, the properties of these products may differ from those of film products made from primary raw materials.

Recycled film products marked "reg" on Filmex Packaging Ltd. delivery notes and invoices may have the following properties:

- Varying tones of colour
- Occasionally strong odour
- May affect products in contact with it
- UV stability uncertain despite additive
- Less resistant to chemicals
- Unsuitable for direct food packaging
- May contain small impurities, burns
- Longitudinal and transverse shrinkage, tensile strength highly variable
- Does not meet any requirements for degradable additives.

Pécs, 04.02.2024.
