WELCOME!

Welcome to Filmex, where innovation meets sustainability in packaging.

With 5000+ tonnes of annual production since 1996, we specialize in premium solutions for food, industrial, agricultural, and household needs.

Our journey over the years has seen us expand our reach across Europe, supplying 13 countries with a diverse range of recycled, virgin, and food contact products.

Nearly 50% of our production is made from recycled materials, allowing us to offer solutions that not only benefit our customers, but also contribute to a greener future.

At Filmex, we're more than suppliers; we're dedicated allies in your success story. Our service is prompt, flexible, and professional, tailored to your unique needs.

Thank you for choosing Filmex!

ABOUT FILMEX

Filmex Packaging Kft produces polyethylene packaging materials for various industries, including food, industrial, agricultural, and household use.

Established in 1996 and still owned by the founding families, our company has always prioritized development to offer customers the most suitable products for their specific needs.

We are convinced that without continuous improvement it is impossible to keep up with the ever-changing demands of the market - we made our first bigger technological investment in 2003 to invest in more modern machinery so that we could guarantee our customers high-quality, customized products with correct delivery times.

Since 2018, we have continued our production in a new 2000 m² hall in Pécs, and in 2020 we built an 800 m² warehouse and office building.

There are seven extruder lines and eight confectioning machines, including a Hosokawa-Alpine extruder and Günter bag makers in our machinery. This enables us to produce a diverse range of packaging products made from virgin and recycled materials.

We treat all our colleagues fairly and involve them in the quality improvement process, ensuring a fast response and cost-effective working practices, as well as career development opportunities - we have several employees who have been with us from the beginning, contributing to our history of growth.

VISION & MISSION & VALUES

Vision

Our vision is to provide reliable, quality packaging solutions tailored to different industries, ensuring optimal product performance that empower businesses.

Mission

Continuous development drives us forward, as we create products that align with our customers' unique needs.

Our commitment extends beyond product quality, our service marked by promptness, flexibility, professionalism, honesty and a genuine dedication to exceeding expectations.

With a team always at your service, clear communication and unwavering support are the cornerstones of our commitment to create long-lasting relationships with our partners.

Values

At Filmex, our core values are the driving force:

- reliability
- desire to improve
- positive attitude
- knowledge sharing
- honest and open communication
- dedication
- loyalty.

SUSTAINABILITY

At our company, we strongly believe in leading by example when it comes to creating effective solutions for a cleaner and more sustainable planet.

Close to 50% of our production is derived from recycled raw materials, reflecting our dedication to minimizing waste and maximizing resource efficiency.

We prioritize the optimization of our products to align with specific needs, ensuring that we do not contribute to over-consumption or produce items that the market does not demand. This approach protects the environment by reducing unnecessary production and consumption, promoting a more sustainable and balanced ecosystem.

Furthermore, we have taken significant steps towards renewable energy adoption. As part of our sustainability initiatives, 10% of our consumption now comes from renewable energy sources. We have partnered with E-ON to install 125 kW of solar panels on the roof of our production hall. This shift towards solar energy is estimated to allow us to redirect the costs saved to improve our services to our customers and further enhance our environmental impact.

By embracing sustainability as a fundamental aspect of our operations, we strive to set a positive example for the packaging industry and inspire others to adopt similar practices.

We understand that our actions today have a profound impact on the future of our planet, and we are committed to making a difference through responsible and environmentally-conscious manufacturing.

CERTIFICATES

At Filmex Packaging, quality is at the core of our values. We strongly believe that the ultimate measure of our success lies in the satisfaction of our partners. To ensure the highest standards, we adhere to internationally recognized professional norms that are universally interpreted, guaranteeing consistent quality across the globe.

ISO 9001:2015

ISO 9001:2015 certification recognises the high standards of quality management. It is a standard that supports the organisation's operations with a realistic approach, enabling the management system to become a productive tool. It demonstrates that an organisation can consistently and continuously manufacture a product and provide a service that meets customer and regulatory requirements.

ISO 14001:2015

ISO 14001:2015 specifies the requirements for an environmental management system that an organization can use to enhance its environmental performance. ISO 14001:2015 is intended for use by an organization seeking to manage its environmental responsibilities in a systematic manner that contributes to the environmental pillar of sustainability.

The BRC Global Standards

The BRC Global Standards' aim is to certify a set of standards for food safety and quality for companies in the food industry. Our company is committed to meeting the highest food safety standards, increasing the satisfaction and confidence of our business partners in our products.

Through the dedicated efforts of our colleagues and the modern infrastructure at our disposal, we can ensure the high level of product safety required.

PACKAGING MATERIALS

We are dedicated to providing efficient and reliable packaging solutions that meet the highest standards of quality and functionality.

Whether you require bags, pouches, flat films, sheets, shrink films, tubes, half-tubes, pallet covers, or shrink hoods, we have the right packaging products to meet your specific needs.

For partners in the food industry, we offer packaging materials that comply with the strict BRC Global Standards. These standards ensure that our products meet the highest levels of safety, quality, and hygiene, making them suitable for food packaging applications, this way we can provide peace of mind to businesses in the food sector, knowing that their products are packaged in materials that adhere to industry regulations.

Today, half of our production is made from recycled materials, which we also sell to packaging wholesalers, making our environmentally friendly products more widely available
